Career Objective

As a motivated and detail-oriented web development fresher, I am eager to apply my skills in HTML, CSS, JavaScript to a dynamic team. My academic background and personal projects have equipped me with a solid foundation in web development and problem-solving abilities. I am passionate about creating user-friendly and visually appealing websites, and I am keen to contribute my technical expertise to develop innovative web solutions. Seeking an entry-level position where I can continue to learn, grow, and make meaningful contributions to a forward-thinking organization.

Projects

LIBRARY MANAGEMENT SYSTEM-

Developed a Library Management System using **HTML, CSS, PYTHON, SQL, MYSQL**. streamlining book cataloging, member registration. Implemented search functionality and user authentication. Enhanced efficiency by automating routine tasks, reducing manual errors, and providing a user-friendly interface for library staff and members.

E-Commerce website-

The Apple Fruit Selling e-commerce website, built with HTML and CSS, provides a user-friendly platform for browsing and purchasing fresh apples, featuring a homepage, detailed product pages, and responsive features for accessibility on desktop and mobile devices.

OTP Gnerator -

It fetches a random joke from an API and displays it on the webpage. The user can generate a new joke by interacting with a button, which triggers another API call to fetch a fresh joke.

Dictionary -

It allows users to search for word definitions using an external API. The user-friendly app provides meaning, pronunciation, and usage, showcasing Ahmed's ability to integrate APIs.

Random Joke Generator -

It generates random jokes from an API, using JavaScript, HTML, and CSS, showcasing asynchronous API calls, DOM manipulation, and responsive design.
